Ultima Vulnerability Management as a Service

Without the right tools, organisations can be unaware of the true extent of vulnerabilities facing their business, until they have been exploited. Even then, they may not surface if the attack has no apparent impact, leaving data and systems exposed for significant periods. Furthermore, by failing to patch or update critical software, the exploits associated with legacy versions remain, which can have a catastrophic impact on systems, PII and intellectual property, should they be exploited.

Vulnerabilities are not just linked to external opportunists and those with malicious intent. Often they exist internally too, allowing rogue employees to leverage vulnerabilities to gain access to systems or traverse your network, without consent.

Powered by Qualys and delivered by Ultima's cyber security analysts, our Vulnerability Management service provides regular identification and classification, helping to prioritise vulnerability remediation activities, reducing your exposure to internal and external threats.

Powered by Qualys and fully managed by Ultima, 24x7

Delivered in house by our team of security experts
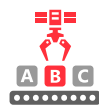

3 distinct flavours, Essentials, through to Ultimate

Asset discovery across global hybrid-IT estate

Start planning on Cyber Essentials Plus etc.

Insights from over 180k vulnerabilities from 25+ sources

Why Scan for Vulnerabilities?

After any significant event, e.g. mergers, acquisitions & transition to home working

You recently experienced a breach, which was tracked down to your firewalls

After a change in staff or managed service provider, to rule out residual access

Ensure you are continuing to meet regulatory and industry compliance

You operate public facing servers or websites that could be at risk

You're unable to interpret the sheer weight of spurious data and false positives

Struggling to identity and prioritise risks, associated with vulnerabilities

We can offer a cost effective solution for vulnerability management

Ultima

Service Plans

From corporate espionage to financial motivation, criminals are constantly on the look out for organisations who are behind on their security mitigation activities, so they can exploit them. Our Managed Vulnerability Scanning service is available in three different flavours, each with increasing levels of ownership and accountability, to provide you with the appropriate support for your requirements and budget. Pricing starts from just 16 hosts (with each host being an active IP address), doubling all the way up to more than 5,000 hosts, allowing you to cover partial and complete subnet ranges, through to your entire organisation.

Description	Essentials [1]	Advanced	Ultimate
Change Management - Changes per Annum	12	24	36
