

Knowledge Lab

Cyber Security Awareness and Training

In the UK, 73% of employees do not receive any cybersecurity training. Often these people are the first line of defence when dealing with social engineering attacks. Knowledge Lab is a complete security awareness and learning resource platform, providing cyber security training that makes complex issues understandable. Transferring expert security advice and defensive strategies to your employees, simply. We engage with your staff and teach them the importance of information security.

Antisocial Knowledge Lab Platform

- Feature packed LMS (Learning Management System)
- Interactive online courses
- Cyber security training
- Extensive awareness communications
- Track learner progress

Real Awareness

Online Training Courses - interactive courses that breakdown common security subjects, such as passwords, phishing, GDPR and remote working.

Track User Engagement - incorporates your policies, supporting documents and training reports for all your compliance and training requirements.

Create Some Healthy Competition - get users engaged by earning badges, certificates and competing in a company wide leaderboard.

Access Our Library - we have a growing library of internal communications that can be used to alert users to security issues.

Delegate Access - there is no reason to exclude anyone from the process, Knowledge Lab allows you to appoint group leaders to access training, view reports and administer training.

No Email Address? No PC? No Problem - we can help you enrol your staff using a range of methods on multiple supported devices.

Online Courses

CYBER SECURITY MODULES

- Easy to Understand
- Real Tips and Advice
- Cost Effective Education

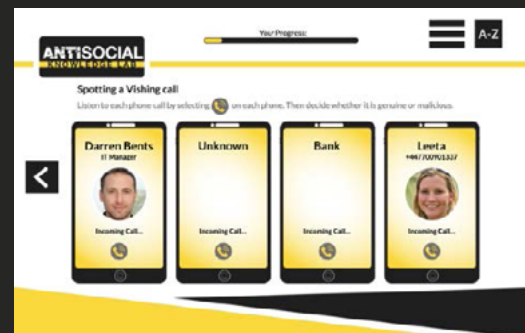

NAVIGATE WITH EASE

- Easy to Navigate
- Fast and Responsive
- Accessibility Support

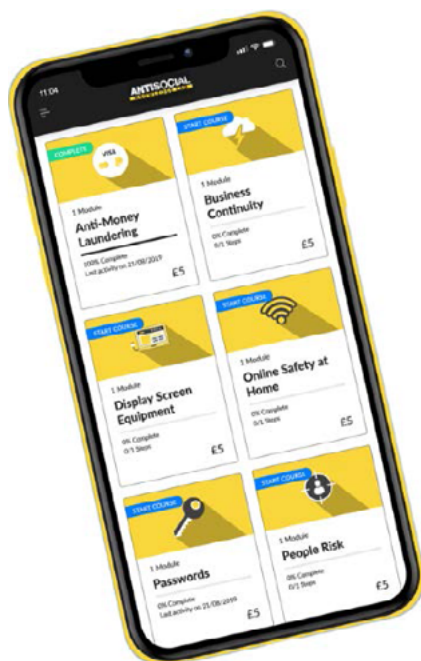

MORE THAN COMPLIANCE

- Up to Date Education
- Compliance and Auditing
- Incorporates your Policies

INTERACTIVE ELEMENTS

- Scoring Functionality
- Positive Reinforcement
- Ensure Understanding

Mobile Responsive

To reach your people, we understand traditional training has to change. People want the option to complete education on their phones, laptops, Kindles, VR Headsets and smart fridges.

When they like, wherever they like. Expert instructional designers have contributed to ensure we can meet that expectation.

Mobile compatibility is about removing the barriers people face when having to learn a new topic, so organisations can keep focussed on improving their security culture.

Policies and Communications

KNOWLEDGE LAB INCORPORATES YOUR POLICIES

Additional documents and policies can be added to your platform. Encompassing auditable functionality for all your policy requirements. Providing metrics on users that have read your policies and the time spent reading them.

KNOWLEDGE LAB COMMUNICATIONS

Training communications, updates on new content and newsletters sent straight to your employees. We help make security a talking point within your organisation.

Printed Assets

We have the option of creating printed assets to place around your office, they can be branded as required. Some examples are below.

POSTERS

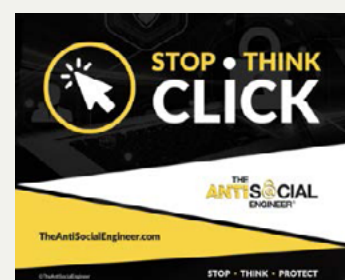

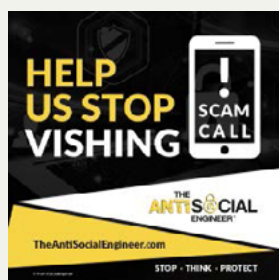

Place reminders where they need to be. Keep people thinking and talking about the risks with our fully customisable posters.

STICKERS

Stickers placed on doors warning of tailgating, stickers on phones that remind you about the dangers of Vishing.

MOUSE MATS

Place reminders where they need to be. Right at the point of a click.
