

# Microsoft TSI Service

## Microsoft TSI

TSI, or Tech for Social Impact, is a crucial initiative in the tech world. Microsoft, a leader in business and tech, is pivotal in shaping the future. The Microsoft Tech for Social Impact Programme is dedicated to making technology and essential tools affordable and accessible for nonprofits of all sizes. Its main mission is to empower organisations.

Starting November 2023, accredited organisations can use the Microsoft CSP agreement and embrace the New Commerce Experience, revolutionising how they get Microsoft cloud services. This move signifies a significant shift in how nonprofits can use technology to amplify their impact.

## Social impact

Ultima, as a responsible and forward-thinking entity, is wholeheartedly committed to delivering cloud solutions that are not only relevant but also affordable and innovative.

Our ultimate goal is to provide nonprofit organisations with the tools they need to address some of the most pressing global challenges. In doing so, we aim to be a catalyst for positive change in the world.

As a Direct Microsoft CSP partner of Microsoft, we are uniquely positioned to offer our customers competitive pricing that ensures their financial resources are maximised for their mission. But our commitment goes beyond just affordability. We pride ourselves on providing unrivaled support to our customers, ensuring that they not only adopt these services effectively but also realise the full potential of their investment, thus achieving a substantial return on investment "ROI".

## The opportunity for charities

We're offering a great chance for organisations to gain deep insights into their cloud setup. This initiative helps you smoothly switch from the old CSP to the modern New Commerce CSP agreements. Our expert team is here to guide, assess, plan, and execute the transition for a smooth journey.

Besides cost-efficiency, we believe in the power of knowledge and innovation. Spending time with our specialists will help your organisation not only understand your options but also see the benefits of early adoption in the NCE CSP arena. This opportunity is about empowering you to embrace innovation, cut costs, and make a greater impact on the world.
