

# TOP 5 TOOLS LIKELY COVERED BY M365 E5

Prism for Security helps organisations maximise Microsoft 365 E5 by consolidating security tools, reducing complexity, and cutting unnecessary costs. It provides a clear roadmap to strengthen your security posture while eliminating overlapping solutions, so you can optimise spend without compromise.

## Advanced Threat Protection

(Microsoft Defender for Endpoint)

Many organisations pay for endpoint protection solutions, but E5 includes Microsoft Defender for Endpoint with advanced threat detection and response.

## Email Security & Anti-Phishing

(Microsoft Defender for Office 365)

Third-party tools often duplicate E5's built-in capabilities for phishing protection, safe links, and attachment scanning.

## Cloud App Security

(Microsoft Defender for Cloud Apps)

Companies frequently invest in CASB solutions, yet E5 provides native cloud app discovery, control, and threat protection.

## Identity and Access Management

(Azure AD Premium P2)

Features like Conditional Access, Privileged Identity Management, and Identity Protection are included in E5, reducing the need for separate IAM tools.

## Information Protection & Compliance

(Microsoft Purview)

Organisations often buy standalone DLP or compliance tools, but E5 offers integrated data loss prevention, eDiscovery, and compliance management.

### Ready to simplify your security and save costs?

Discover how Prism for Security can help you consolidate tools, maximise E5 value, and strengthen your security posture.
